As a responsible company our natural business approach has been to put in place measures, which contribute to the safeguarding of the planet and this is done through 5 key areas:

- Development of products less harmful to the environment,
- Management and treatment of waste product,
- Use of recyclable packaging,
- Detailed technical data for the user,
- Encouragement of eco-friendly use.

A COMPANY THAT HAS PROTECTED THE INDUSTRY FOR MORE THAN 90 YEARS

Owatrol International, a subsidiary of Groupe Durieu – France, has been supplying care and maintenance products to industry and shipping firms for several decades. The effectiveness of our systems has been proven from the Arctic fjords of Norway to the Caribbean Islands, giving lasting protection against the rigours of multiple climates. For over 60 years, Owatrol has played an important role to both its' commercial and DIY clients around the world, in the painting, protection and maintenance of interior and exterior surfaces. Within the cruise industry; Owatrol has created a niche market by supplying a wide range of premium quality products incl. wood finishes, primers, topcoats, paints, strippers, rust prevention products and oils to help safeguard your vessels.

Owatrol has built its reputation on supplying high quality products, while providing new ways to make a variety of jobs easier. Our maintenance products help enhance productivity (ease of application) and efficiency, while giving your vessels the aesthetic beauty and protection needed to preserve your investment.

In conclusion, no ship should be sailing without the Owatrol line of products.

Rieu technology: investing in the future

With seasoned scientists, researchers and cutting edge technology, our on-site Groupe laboratory improves our expertise daily.

Offering new, innovative and ever more effective products through research and development, our commitment is to provide technical and cost effective solutions that meet international standards both regulatory and environmental.

Our commitment: premium quality products and high quality standards

Groupe Durieu - France has invested in production plants that comply with the highest of standards. ISO 9001 (Quality), ISO 14001 (Environment), OHSAS 18001 (Security), Ecolabel and NF Environment certificates and labels are the results of those investments.

In addition, for many years Groupe Durieu has established its own charter showing the importance of and our commitment to, the environment, our customers and our employees.

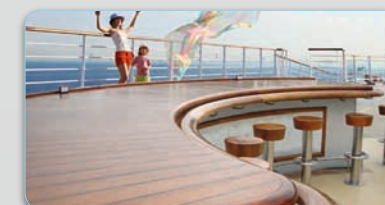

Technical service expertise

Our mission is to constantly remain at the fore front of the industry. To achieve this, we must understand our customers' needs and requirements, going that extra mile to provide unique and reliable solutions.

To meet our commitment to excellence we have established an exceptional technical sales and production team that puts customers' needs first. Giving a detailed and expert analysis they will give a recommended proposal along with a specification to provide a customised solution.

Our technical service department has earned a reputation for quality, reliability and professionalism. Ask our knowledgeable experts on how to protect and maintain your assets.

Worldwide network : Owatrol suppliers are available in major ports around the world, with distribution centers in North America and Europe to support the growing demand for the Owatrol marine line of products.

High quality products, customer satisfaction, commitment towards protecting our environment, safe workplace practices and our pursuit of excellence have led to our success for almost 10 decades and will carry us into the future, as your supplier of choice for quality marine coatings.
